

Procent, celota in delež (računanje z Excelom)

$$p = \frac{d}{C}$$

d = delež
C = celota
p = procent (%)

$$C = \frac{d}{p}$$

d = delež
C = celota
p = procent (%)

$$d = C * p$$

d = delež
C = celota
p = procent (%)

Pomanjšana in povečana celota (računanje z Excelom)

$$C1 = C * (100\% - p)$$

C = C1/100-p
pomanjšana celota

$$C1 = C * (100\% + p)$$

C = C1/100+p
povečana celota

Del in celota (računanje brez Excela)

$$p = \frac{100 * d}{C}$$

d = delež
C = celota
p = procent (%)

$$C = \frac{100 * d}{p}$$

d = delež
C = celota
p = procent (%)

$$d = C * \frac{p}{100}$$

d = delež
C = celota
p = procent (%)

$$C - d = C * \left(1 - \frac{p}{100}\right)$$

pomanjšana celota

$$C + d = C * \left(1 + \frac{p}{100}\right)$$

povečana celota
